

FRONT-END DEVELOPMENT

ASSIGNMENT 1

STUDENT NAME: ANAND P

YEAR: II

COLLEGE CODE: BRUAQ

**COLLEGE NAME: PURATCHI THALAIVI AMMA GOVERNMENT ARTS AND SCIENCE
COLLEGE,PALLADAM-641664**

DEPARTMENT: B.Sc COMPUTER SCIENCE

SEMESTER:4

ROLL NO:24UCS020

REGISTER NUMBER: 2422K2192

NMID: 9F82C4EE65580998D0E44BED9F

DATE:26-02-2026

PROJECT TITLE: SIMPLE EVENT REGISTRATION FORM

1. Assignment and Assumptions:

1.1. Assignment:

The proposed assignment is to design and develop a Simple Event Registration Page using HTML, CSS, and JavaScript.

The web page should allow users to:

View event details

- Enter personal information
- Select event preferences
- Submit registration details
- View registered participants (static table)

The project is developed without using any backend or database. All functionalities are implemented using client-side technologies only.

1.2.Purpose:

The main purpose of this assignment is to understand how front-end technologies work together to build a complete web application interface.

By completing this project, I aim to:

- Learn how to structure web pages using HTML
- Improve design skills using CSS
- Implement interactivity using JavaScript
- Understand form validation techniques
- Work with DOM manipulation
- Create dynamic content without page reload

This assignment helps simulate a real-world registration system using only front-end development concepts.

2.Problem Statement:

In many educational institutions and organizations, event registration is often handled manually or through complex systems.

There is a need for a simple, user-friendly, and interactive event registration page that:

- Collects user details properly
- Validates data before submission
- Displays registered participants dynamically
- Prevents incorrect or duplicate entries

This project solves the problem by creating a fully interactive registration interface using only HTML, CSS, and JavaScript.

3.Expected Features:

3.1Event Title and Description:

Event Title:

Fround-end-development 2025

Description:

Fronend-development 2025 Summit is a technical event organized to enhance students' knowledge in modern technologies such as Web Development, Artificial Intelligence, and Software Engineering.

The event includes:

- *Web Development Workshop*
- *AI & Machine Learning Seminar*
- *24-Hour Hackathon*

The objective of the event is to encourage innovation, creativity, and practical learning among students.

3.2Event Information & Registration Form Section:

This section includes:

- *Event Information*
- *Registration Form*
- *Personal Information*
- *Event Selection*
- *Additional Details*
- *Declaration*
- *Form Controls*

3.2.1 Personal Information Fields:

- *Name*
- *Email*
- *Phone Number*
- *Date of Birth*
- *Gender*

3.2.2 Event Selection Fields:

- *Event Type (Workshop / Seminar / Hackathon)*
- *Mode of Participation (Online / Offline)*

Additional Details:

- *College / Company Name*

Declaration:

"I confirm that the above details are correct."

Form Controls:

- *Submit Button*
 - *Reset Functionality (after successful submission)*
-

Sample Filled Data

3.2.3 Personal Information (EXAMPLE)

- *Name: XYZ*
- *Email: xyz@gmail.com*
- *Phone Number: 9876543210*
- *Date of Birth: 12/02/2006*
- *Gender: Female*
- *Event: Web Development Workshop*
- *Mode: Offline*
- *College: ABC Engineering College*

3.3 Registered Participants Section

This section displays the registered participants in a table format

Sample:

Name	Email	Phone	Event	Mode
XYZ	xyz@gmail.com	9876543210	Web Development Workshop	offline

Features included:

- **Dynamic row addition**
 - **Delete option**
 - **Participant counter**
 - **Duplicate email prevention**
 -
-

3.4 Footer Section:

Sample:

Contact Email: events@ptacollege.edu

Help Desk Number: +91 94444 12345

Support Timings: 9:00 AM – 4:30 PM (Working Days Only)

4.Implementation Steps:

The following steps were followed to develop this project:

- 1. Designed the basic page structure using HTML.*
- 2. Created sections for event details, registration form, and participants table.*
- 3. Styled the page using CSS with a professional and premium look.*
- 4. Added responsive layout and button hover effects.*
- 5. Implemented JavaScript validation for all form fields.*
- 6. Used Regular Expressions for email validation.*
- 7. Prevented default form submission using event.preventDefault().*
- 8. Dynamically created table rows using createElement() and appendChild().*
- 9. Implemented success message using setTimeout().*
- 10. Added delete button functionality and participant counter.*
- 11. Reset form after successful submission.*

5.Technologies Used:

1. HTML

Used to create the structure of the web page including:

- Headings*
 - Form elements*
 - Input fields*
 - Table structure*
-

```
<!DOCTYPE html>
```

```
<html lang="en">
```

```

Registered Participants

7.Learning Outcome:

By completing this assignment, I gained:

- *Practical understanding of front-end development*
- *Knowledge of HTML form handling*
- *Experience in CSS styling and layout design*
- *Understanding of JavaScript validation techniques*
- *Knowledge of DOM manipulation*
- *Experience in building interactive applications*
- *Improved debugging and logical thinking skills*

This assignment strengthened my ability to build real-world front-end applications without backend support.

8.Conclusion:

The Simple Event Registration Page was successfully developed using HTML, CSS, and JavaScript.

The application allows users to register for events, validates their input, dynamically displays participant details, and provides a professional user interface.

This project demonstrates how powerful client-side technologies can be in building complete and interactive web applications.
